PROFESSIONAL SUMMARY

Offensive Security Enthusiast with a strong foundation in Web Application, API, and Network Penetration Testing. Hands-on experience executing OWASP Top 10 vulnerability assessments, custom recon automation, and Active Directory exploitation in lab environments. Proven track record of identifying real-world security flaws through Bug Bounty programs and practical CTF challenges.

TECHNICAL SKILLS

- **Web & API Security:** OWASP Top 10, SQLi, XSS, SSRF, IDOR, Broken Authentication, REST API Testing
- **Network & Infrastructure:** Port Scanning, Enumeration, Active Directory (Pass-the-Hash, Kerberoasting), Wireless Security
- **Tools:** Burp Suite Professional, Nmap, Metasploit, Nuclei, Wireshark, SQLmap, Hydra, Gobuster
- **Scripting & OS:** Python, Bash, C, JavaScript, R | Kali Linux, Ubuntu, Windows, MacOS

PRACTICAL EXPERIENCE & OFFENSIVE ACHIEVEMENTS

Bug Bounty & Vulnerability Disclosure

- Disclosed 4 validated security vulnerabilities across public/private targets on platforms like OpenBugBounty and Intigrity, drafting comprehensive POC reports with CVSS risk scoring and remediation guidance.
- Investigated and verified CVE-2023-48795 vulnerabilities on corporate SFTP infrastructure using custom Nuclei scans.

PROJECTS

Automated Reconnaissance Script | Python, Bash

- Built a custom recon script leveraging Subfinder, Gobuster, HTTPX, Naabu, and Nmap to streamline asset discovery and port scanning (GitHub: mrnothing8262/MrNothing_Recon_v2.sh).

Dynamic WAF Fuzzer | Python, Machine Learning

- Designed a fuzzer using Logistic Regression to analyze WAF responses, learn triggering features, and intelligently mutate payloads to achieve unencoded reflection (GitHub: mrnothing8262/Nothing_WAF).

EDUCATION & CERTIFICATIONS

Bachelor of Computer Applications (BCA) | JSIMR College, Hadapsar (2026)

- First Year CGPA: 8.91/10 | Currently Pursuing Second Year.
- **Certifications:** CISCO Ethical Hacker (2026) | Targeting/In Progress: CEH Certified Ethical Hacker.
